Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A compound of the formula (I),

where

R is a halogen-substituted alkenyl radical,

and where

Z is either a substituted or unsubstituted pyrrole, ~~heterocyclic radical which contains at least one nitrogen atom and which has linkage at one nitrogen atom to the CS₂R group of formula (I) and which, in the parent form in which there is a hydrogen atom bonded to the nitrogen atom which has linkage to the CS₂R group of formula (I), has a pK_a value in the range from 12 to 20,~~

~~or where~~

~~Z is a radical of the formula (II),~~

where

~~A and B have been selected independently of one another from the group consisting of hydrogen, substituted or unsubstituted alkyl, substituted or unsubstituted alkenyl, substituted or unsubstituted alkoxy, substituted or unsubstituted acyl, substituted or unsubstituted aryl, substituted or unsubstituted aryl, substituted or unsubstituted heteroaryl, substituted or unsubstituted alkylsulphonyl, substituted or unsubstituted alkylsulphinyl, substituted or unsubstituted alkylphosphonyl, substituted or unsubstituted arylsulphonyl and substituted or unsubstituted arylphosphonyl, and where the pK_a value of the protonated form of formula (III)~~

~~is in the range from 12 to 20.~~

2. (Withdrawn - Currently Amended) A process for preparing the compound of the formula (1) (I) according to Claim 1, comprising

a) providing a compound of the formula (IV),

where Z is as defined in Claim 1 and M is an alkali metal,

- b) reacting this compound with a compound of the formula (V)

where R is as defined in Claim 1 and X is Cl, Br or I.

3. (Withdrawn) A process for preparing a polymer by polymerizing monomers in the presence of the compound of the formula (I) as defined in Claim 1.
4. (Withdrawn) The process according to Claim 3, where the monomers are chloroprene and/or 2,3-dichlorobutadiene.
5. (Withdrawn) A polymer obtainable by the process according to Claim 5 or 6.
6. (Withdrawn) A polymer which contains end groups of the formula (VI)

and end groups of the formula (VI a)

where Z and R are as defined in Claim 1.

7. (Withdrawn) The polymer according to Claim 7, where the polymer is polychloroprene poly- 2,3-dichlorobutadiene or polychloroprene-co- 2,3-dichlorobutadiene.
